## Trainer Profiles

- **Abhijit Chatterjee – Lead Trainer**

Abhijit's areas of specialisation spans across climate change, carbon footprint, net zero planning, carbon credits and the circular economy. His areas of expertise extend to institutional design, capacity building, financial analysis, monitoring and evaluation (M&E) and training.

- **Dr. Utparn Dubey – Co Trainer**

Dr. Utparn Dubey has around two decades of experience in **Sustainable Development** and **Clean Energy**, and holds a PhD in Sustainable Development studies. His expertise spans climate change, circular economy and triple bottom line, consulting and advisory in energy and climate space, project development and management, mentoring, training and capacity development.

- **Sreyashee Das – Co Trainer**

**Sreyashee Das** is a climate and sustainability professional with over 12 years of experience in designing and delivering training and capacity-building programs across clean energy, decentralized renewable energy (DRE), electric mobility, circular economy, and sustainability.

- **Dr. Pawan Singh – Green Finance Specialist**

**Dr. Pawan Singh** is a retired bureaucrat who has served a range of ministries and institutions in a stellar service career. He has been a member of Boards of various companies, PSUs, BFSI institutions, and well-known corporate houses for over 20 years and has made considerable contributions to the economy and society.

## Contents

- Module 01: Concepts: GHG emissions and climate change (Abhijit)
- Module 02: GHG Footprint and Net Zero Planning (Abhijit)
- Module 03: Carbon Footprint to Net Zero and C-neutrality (Abhijit)
- Module 04: Sustainability concepts: CSR, ESG & circular economy (Dr. Utparn Dubey / Sreyashee Das)
- Module 05: Sustainability concepts: CSR, ESG & circular economy – II (Dr. Utparn Dubey / Sreyashee Das / Abhijit Chatterjee)
- Module 06: Green Financing (Dr. Pawan Singh)

## Module 01: GHG emissions, climate change & key concepts

Introductory session that would cover key concepts around climate change & GHG emissions

### Key topics covered

**Defining GHGs, climate change and *glocal* environment**

Impacts on agriculture, urban sector and health

Implications for power sector in India

**Evolution of global policy making on climate change**

From Rio to Kyoto and Paris Agreement, Indian carbon market

**How to calculate GHG offsets?**

GHG emissions baseline and emissions factors  
GHG Protocol – Scope 1, 2 and 3

## **Module 02: A primer on GHG Protocol and how to measure GHG Footprint**

Technical session – from GHG offsets to carbon footprints and C-neutrality

### **Key topics covered**

#### **GHG Protocol: Scope 1, Scope 2 and Scope 3 GHG emissions**

Breaking down concepts into workable models

#### **What is Carbon Footprint**

Basic concept, and how to determine Carbon footprints for businesses and processes

#### **Case study analyses, group exercises**

How to assess Scope 1, 2 and 3 emissions, and measure my C-Footprint

## **Module 03: From Carbon Footprint to Net Zero Planning and Carbon neutrality**

Using real time case studies to explain how companies and Governments can plan to secure net zero GHG emissions and achieve carbon neutrality

### **Key topics covered**

#### **From carbon footprints to GHG inventory development**

What is GHG inventory  
and how does one  
measure them

#### **How do we plan to achieve Net Zero GHG emissions**

From GHG inventory to a  
long run trajectory – net  
zero planning

#### **Case studies and group exercises**

Solve actual case studies –  
and do group exercises

## **Module 04: Sustainability concepts: Compliance and ESG to a semi-voluntary CSR**

Session – introduction to key concepts in sustainability reporting

### **Key topics covered**

#### **Sustainability compliance regime in India**

Evolution of the sector, key concepts such as BRSR, ESG and CSR
